

OPTIONAL: Computer Science "Final"

Your mission, if you choose to accept it, is to beat a series of games testing all aspects of creativity and wit. There are a total of 6 games; beat as many as you can. Some require you to best a certain score, others simply need you to win.

Once you beat a particular game please take a screenshot as proof. Place as many as you get inside a folder and email them to me at nnohner@gmail.com with the subject line Last Name + # of games beaten. The top 3 get prizes!!!

Happy gaming,
Nohner

Quicker Games	Longer Games
<p>Game 1: Cursor x10</p> <p>Use your gaming logic to best this simple race to the rooftop game. Good luck. Simply win, no high score requirement.</p>	<p>Game 4: Desktop Tower Defense</p> <p>In this game you create a path that the bad guys have to travel through. I need you to beat level medium. I would play through easy first to understand the different towers and the bad guys you will have to face.</p>
<p>Game 2: Curveball</p> <p>"No matter how good you become at tennis, you can never be better than a wall." Mitch Hedberg. Well, curveball is equally perplexing. The score to beat is 20,205.</p>	<p>Game 5: Motherload</p> <p>Motherload has a mystery buried within. Can you best it? My advice: save often and don't mess around in the shallows, go deep by creating a long vertical tunnel. Warning: huge time commitment.</p>
<p>Game 3: Text Twist</p> <p>Unscramble letters to make words. Find the 6 letter word to move to the next round. Careful for the time limit. Score to beat is 9,870.</p>	<p>Game 6: Bot Arena</p> <p>I created a quick tutorial for this game to give you some hints on game dynamics. Beat the career mode and you win!</p>
